PROFESSIONAL SUMMARY

QA Engineer with a solid foundation in software testing and hands-on experience in test case design, test plan creation, manual testing (Functional, Regression, Smoke, UAT, Exploratory), API testing with Postman, and professional defect reporting. Demonstrated ability to establish QA processes from scratch, manage the complete defect lifecycle, and ensure comprehensive system quality prior to go-live. Seeking to contribute to a professional QA/QC team, elevate product quality standards, and deliver the best possible experience to end users.

WORK EXPERIENCE

QA Tester / Sub Lead | Sabo Game

01/2026 – Present

- Designed and executed test cases for core game features, including character systems, maps, NPCs, events, and in-game activities
- Performed Smoke Testing for each new build, along with Functional Testing, Exploratory Testing, and Regression Testing to identify defects
- Detected, analyzed, and reported bugs with complete documentation: steps to reproduce, expected result, actual result, severity, and priority
- Collaborated closely with developers to verify defects, perform re-testing, and validate bug fixes
- Took on the role of QA Sub Lead: assigned testing tasks to team members, monitored bug resolution progress, consolidated build quality reports, and supported project schedule management

Tools: Lark (bug tracking) • Excel / Google Sheets • Manual Testing

QA Tester / Software Deployment | VIMASS

08/2025 – 01/2026

- Performed Functional Testing, Usability Testing, and User Acceptance Testing (UAT) for enterprise software systems.
- Executed API testing with Postman: validated request/response payloads, status codes, authentication flows, and error handling.
- Logged, categorized, and reported defects in detail; conducted re-testing and Regression Testing post-fix.
- Collaborated closely with the development team to ensure system quality before go-live deployment.
- Gathered user feedback to drive product improvement; produced quality progress reports.

Tools: Postman • Excel / Google Sheets • UAT Documentation • Bug Report
